***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-21, drawn to image transformation based on pixel density, classified in class 382, subclass 274.
  - II. Claims 22-45, drawn to image transformation by correcting the image resolution, classified in class 382, subclass 299.
  - III. Claims 46-54, drawn to transformation according the frequency band of the respective intermediate signals, classified in class 382, subclass 280.
  - IV. Claims 55-60 and 61-72, drawn to image processing at different image resolution and at different frequency bands, classified in class 382, subclass 240.
  - V. Claims 73-99, drawn to enlargement transformation, classified in class 382, subclass 298.

The inventions are distinct, each from the other because of the following reasons:

Inventions I through V are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention I has separate utility such as intensity, contrast, or shading correction. Invention II has separate utility such as achieving compatibility between input and output devices. Invention III has separate utility such as removal of periodic noise patterns from an image. Invention IV has separate utility such as improving image contrast for optimized detection of features

of interest. Invention V has separate utility such as geometrically registering multiple images of the same or different scenes. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

#### ***Conclusion***
